2. MAYOR'S REPORT

2.1 In-Year Report – Monthly Budget Statement

This report represents the S71 MFMA monthly budget statement for the month of December 2020 and it reflects on the implementation of the budget and the financial state of affairs of the municipality. Section 52(d) of the Municipal Finance Management Act (MFMA) determines that the Executive Mayor must within 30 days of the end of each quarter submit a report to the Council on the implementation of the budget and the financial state of affairs of the Municipality.

I hereby wish to submit a report to the Municipal Council on the implementation of the budget and the financial state of affairs of the Municipality as at the end of December 2020.

Further to the above, Section 54(1) of the MFMA determines that the Executive Mayor must consider the Section 71 report submitted by the Accounting Officer to him and check whether the Municipality's approved budget is implemented in accordance with the approved Service Delivery Budget Implementation Plan (SDBIP) and if necessary issue appropriate instructions to the Accounting Officer.

The submission of this report is part of the Executive Mayor of the Drakenstein Municipality's responsibilities as set out in section 52 (d) of the MFMA. This report is intended to inform the Council on the state of the financial affairs of the Municipality to enable Council to exercise its oversight responsibility.

2.1.1 Implementation of budget in terms of SDBIP

Management is in the process of reviewing the operational expenditure budget in order to adjust downwards accordingly in line with current cashflow limitations and the mid-year budget performance assessment report will indicate that an Adjustment Budget must be tabled at the end of February 2021.

2.1.2 Financial problems or risks facing the municipality

Currently there are no immediate financial problems facing the municipality but the below is highlighted for the reader to take cognizance of.

- (a) Council should note that the current ratio has regressed due to increased commitments as at the end of December 2020.
- (b) The cash coverage ratio has regressed due to payment of interest and redemption obligations during December 2020. The ratio is well below the norm and cost containment strategies should be continued to be implemented.

2.1.3 Other information

Additional clarity on the content of this report or answers to any questions posed will be given at the next Finance Portfolio Committee meeting.

EXECUTIVE MAYOR

3. EXECUTIVE SUMMARY

3.1 Introduction

In accordance with Section 71(1) of the Municipal Finance Management Act (MFMA), I submit the required statement on the state of Drakenstein Municipality's budget reflecting the particulars up until the end of December 2020.

Section 54(1) of the MFMA requires from the mayor of a municipality to take certain actions if needed on the receipt of this report to ensure that the approved budget is implemented in accordance with the projections contained in the Service Delivery and Budget Implementation Plan (SDBIP).

Section 52(d) of the MFMA requires from the Mayor to submit a quarterly report to Council on the implementation of the approved budget. The period involved is 1 October 2020 to 31 December 2020.

The outcomes for the 2019/2020 financial year have not been audited and is not included in the schedules for the monthly report of December 2020. The Annual Financial Statements for the financial year ending 30 June 2020 was submitted for audit to the AGSA on 31 October 2020 and is still subject to audit.

3.2 Consolidated Performance

3.2.1 Against annual budget (original approved and latest adjustments)

Council approved the original budget in May 2020, the capital and operational adjustments budget was approved by Council in December 2020.

3.2.1.1 Operating revenue by type

The operating revenue budget (including capital transfers) was decreased from R2,599,369,198 to R2,546,148,088 during the adjustments budget in December 2020 which is mostly attributed to changes in the 2020/2021 grant allocation from the national and provincial fiscus as well as roll-overs relating to committed expenditure at the end of June 2020.

Total operating revenue to date is R 1,189,691,756; this includes levied or billed amounts for property rates, water, electricity, sanitation and refuse, compared to total operating revenue budget to date of R 1,197,819,082 which brings about a variance of 0.68%.

The main reason for the variance is decreased consumption in electricity charges, specifically pre-paid electricity sales where it was identified that less units of electricity was sold when compared year to date to the same period as last year.

In addition to the above, it should also be noted that the following line items are also below the year to date projected budget due to the following:

- a) Connection fees;
- b) Commercial Electricity sales; and
- c) Availability charges.

The above will have to be reviewed and necessary changes to be done in the February Adjustments Budget.

The rental charges for flats were reviewed as a lot of the indigent households reside in these units and impacts on the Equitable Share. This was approved by Council during a special council meeting in October 2020. All necessary adjustments to the budget will only be done after the mid-year budget performance assessment review at the end of January 2021.

It should also be noted that the half-yearly journals for Fines recognition in terms of iGRAP 1 was processed in the month of December based on the latest information on fines issued for the year. This information indicates that more fines were issued than estimated and resulted in a positive variance. This latest information will be incorporated in the adjustments budget as well.

3.2.1.2 Operating expenditure by type

The operating expenditure budget was decreased from R2,515,184,421 to R2,450,670,021 during the adjustments budget in December 2020 which is mostly attributed to changes in the 2020/2021 grant allocation from the national and provincial fiscus as well as roll-overs relating to committed expenditure at the end of June 2020.

Total operating expenditure to date amounts to R1,193,704,929 compared to total operating expenditure budget to date of R 1,236,652,397 that brings about a variance of 3.47%. The variance is mainly attributable to under expenditure on Employee related cost, Contracted Services and Other Expenditure. Please refer to table C4 on page 21 for Breakdown of Expenditure by Type.

The underspending on Employee Related Cost is directly related to the moratorium placed on vacancies and not to immediately appoint staff after retirements and resignations as part of an expenditure management strategy to ensure that cash coverage stabilises and improves.

This underspending will however be used to fund the implementation of the collective agreement for the 2020/2021 financial year as the municipality was not successful in the exemption application. All indications are that the implementation as required will necessitate further decreasing of other line items and expenditure categories to ensure sufficient funds are available. This will also be attended to with the February Adjustments Budget.

The underspending on Bulk Purchases correlates to the decreased sales as reported under income as less units were purchased as a result of a decrease in demand. As previously mentioned, the half-yearly journals for Debt Impairment on Fines in terms of iGRAP 1 was processed in the month of December 2020 based on the latest information for the year. This information indicates that an increase in the Debt Impairment on Fines is estimated. This latest information will be incorporated in the adjustments budget as well.

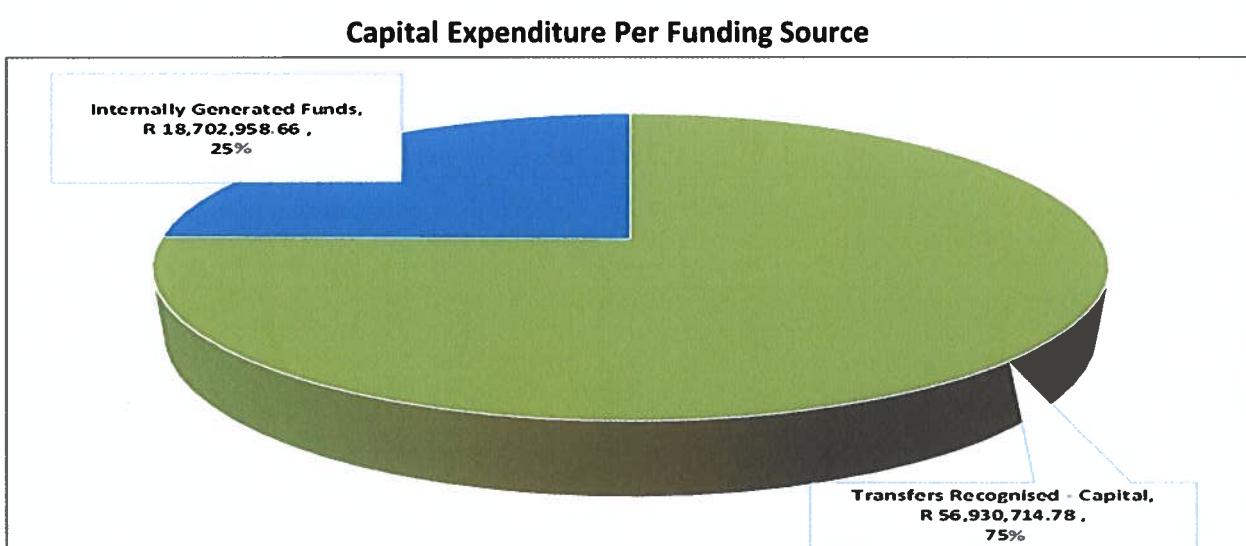

The underspending on other expenditure is due to the implementation of various expenditure management and cost containment strategies.

3.2.1.3 Capital expenditure

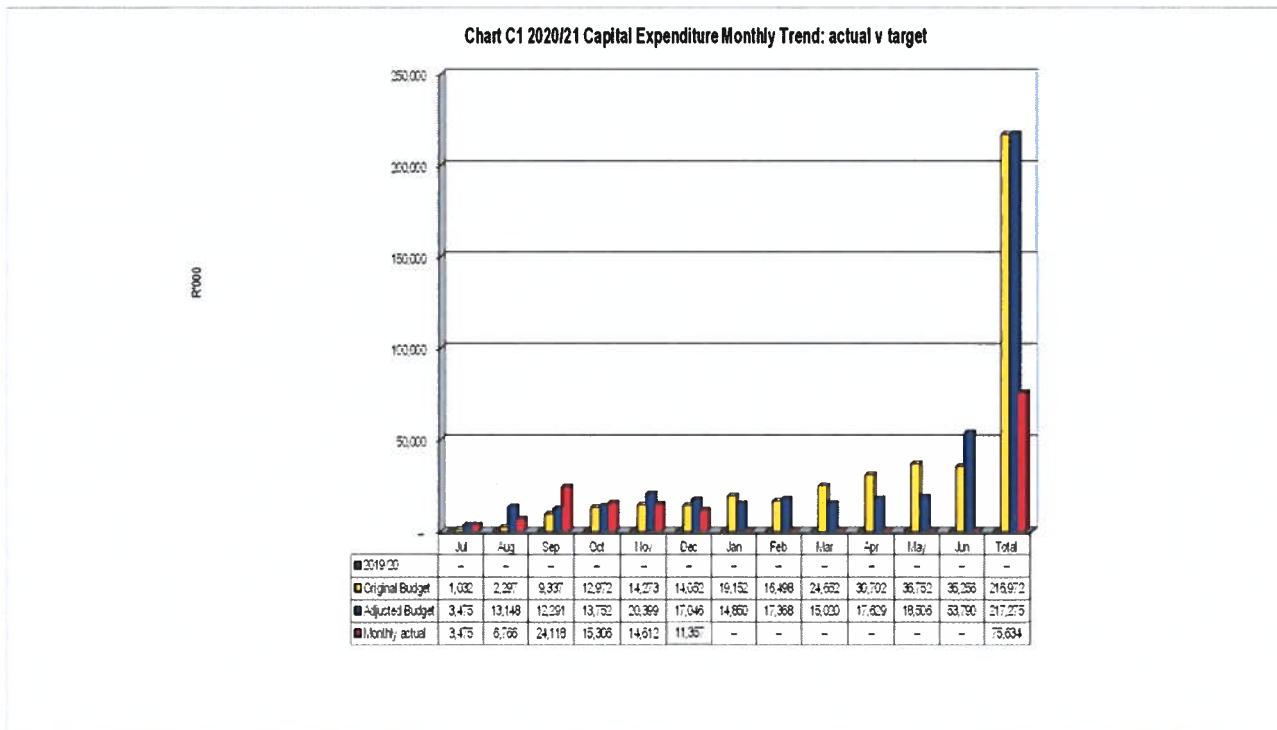

Total actual capital expenditure as at December 2020 is R75,633,673 (34.81%) of the total capital budget of R217,275,140. Capital commitments as at December 2020 is R37,892,397 (17.44%) of the total capital budget of R217,275,140. Total capital expenditure inclusive of capital commitments as at December 2020 is R113,526,071 and that represents 52.24% of the total capital budget. Please refer to table C5 (page 22) for Capital Expenditure per Government Finance Statistics and table SC12 (page 33) for the monthly Capital Expenditure Trend.

Below are two graphs relating to capital expenditure as at 31 December 2020:

- 2) Capital Expenditure Monthly Trend

3.2.1.4 Cash flows

The cash flow is currently positive and the total Cash and Cash Equivalents as at 31 December 2020 is R119,329,464 (Financial Institutions) a decrease of R91,332,947 from November 2020. Please refer to C7 on page 24 for the monthly budget statement – cash flow.

The graph below shows the movement of Cash and Cash equivalents on a month to month basis from December 2019.

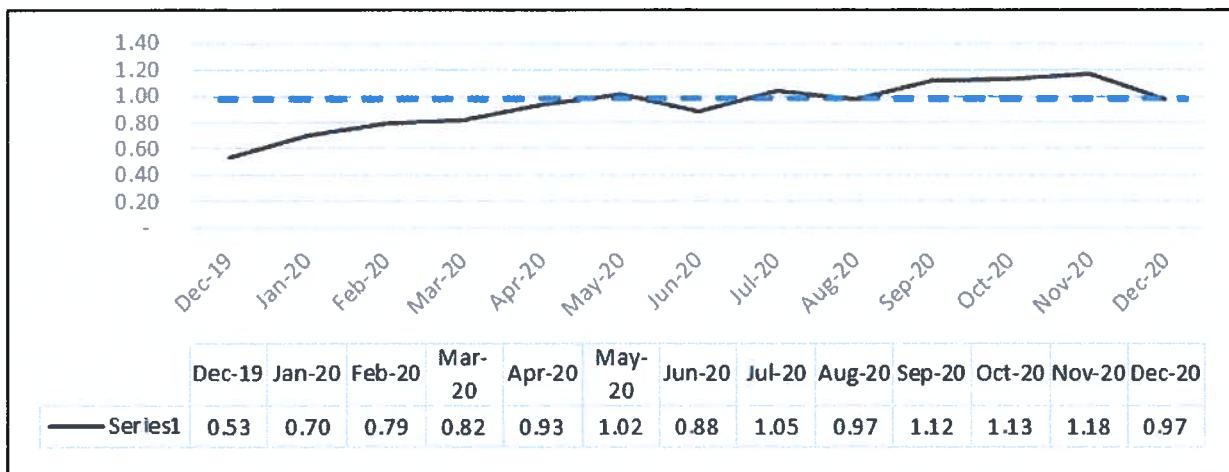

Total Cash & Cash Equivalents

3.2.2 Reports, tables, charts and explanations

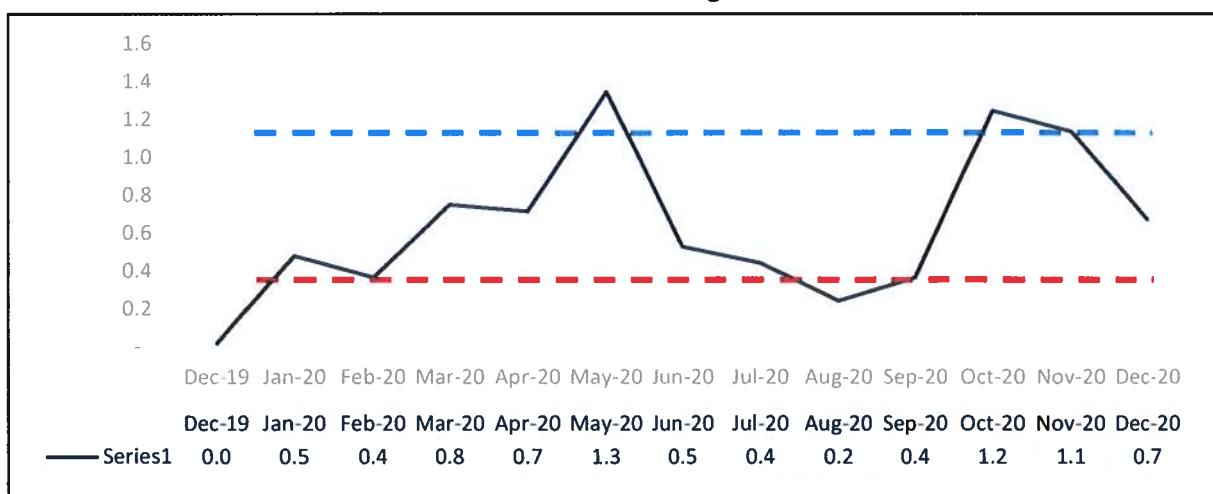

Summary tables and charts are included for this section of the December 2020 Monthly Budget Statement report. Furthermore, the following ratios are included in this report which depicts the month on month trend from December 2019.

Current Ratio

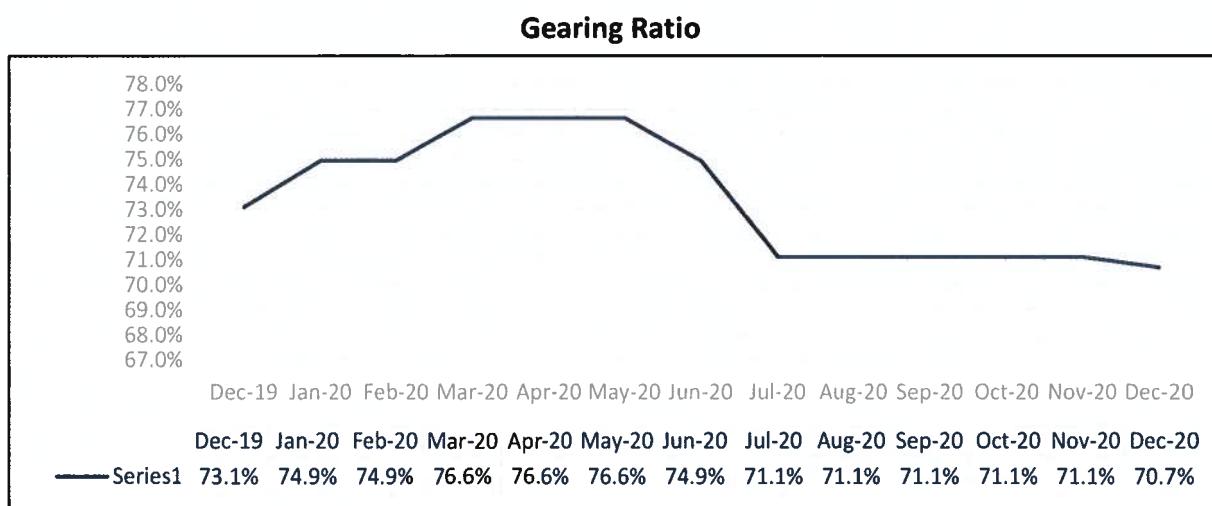

The current ratio measures the ability of the municipality to pay back its Short-term Liabilities (Debt and Payables) with its Short-term Assets (Cash, Inventory, Receivables). The municipality had a current ratio at the end of December 2020 of 0.97:1 (November 2020: 1.18:1). The ratio decreased from November 2020, due to the payment of long-term loans at the end of December 2020, but has improved overall since December 2019, after the majority of long-term borrowings were restructured.

Cash Cost Coverage

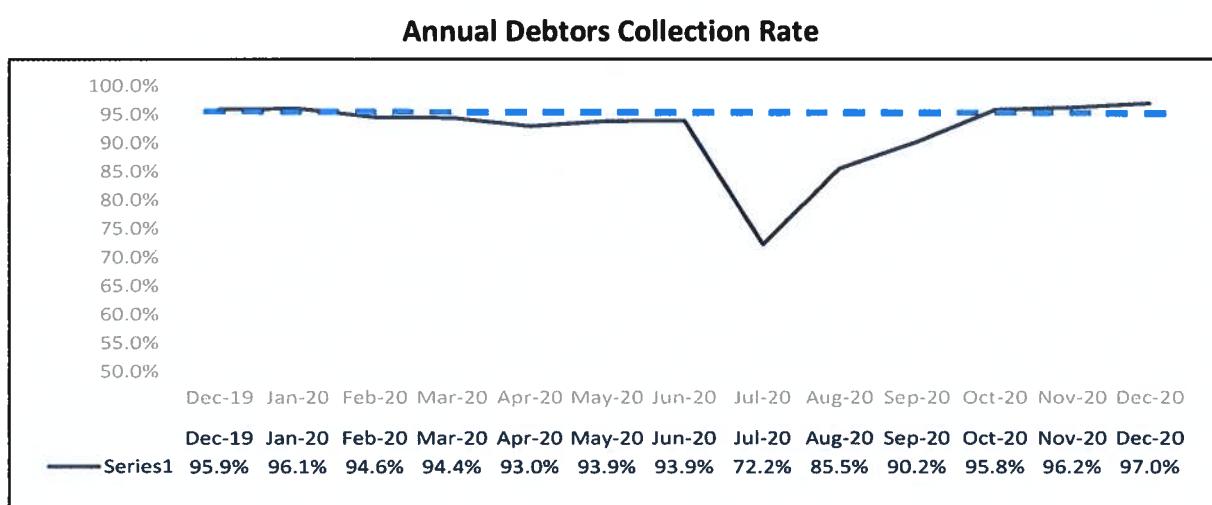

The cost coverage ratio indicates the municipality's ability to meet its monthly fixed operating commitments from cash and short-term investment without collecting any additional

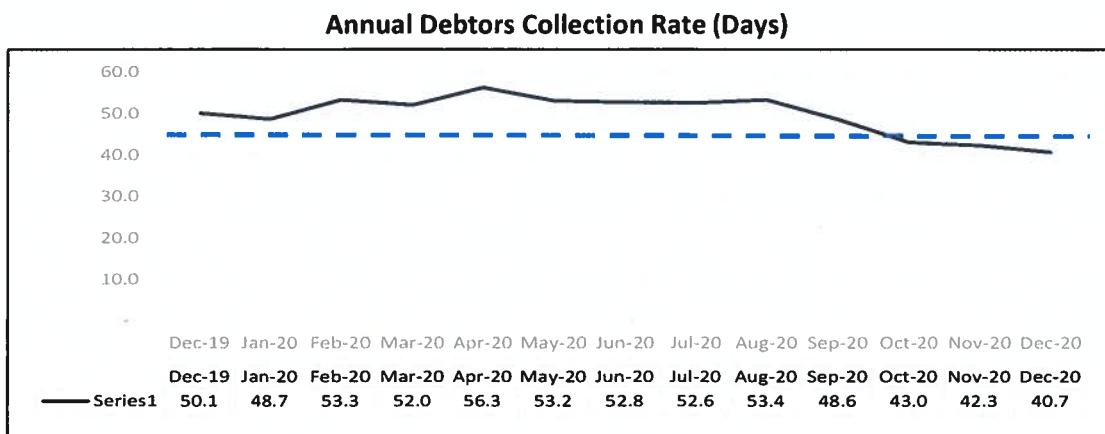

revenue, during that month. The ratio regressed in June after interest and redemption payments to the amount of R112 million was done, which decreased the cash reserves built up over the past few months considerably. The trend followed with the interest and redemption payments made in December 2020.

The gearing ratio indicates the extent of Total Borrowings in relation to Total Operating Revenue. It indicates short- and long-term debt financing relative to operating revenue of the municipality. The municipality had a gearing ratio of 70.7% at the end of December 2020 (November 2020: 71.1%) when comparing the actual debt to the budgeted revenue for the year. The decrease in the gearing ratio from November 2020 to December 2020 was due to the after interest and redemption payments at the end of December 2020.

The debtor's collection rate ratio indicates the collection rate (average year to date); i.e. level of payments. It measures increases or decreases in Debtors relative to cumulative actual billed revenue. The collection rate at the end of December 2020 stood at 97.0% (November 2020: 96.2%).

The debtor's collection rate, in days, indicates to the average number of days required for a municipality to receive payment from its consumers for bills/invoices issued to them for services. The collection rate at the end of December 2020 stood at 40.7 days (November 2020: 42.3 days).

3.3 Material variances from SDBIP

No additional comments.

3.4 Remedial or corrective steps

There is a need to continuously focus on credit control and debt collection processes. Further reduction of the MTREF capital budget out of own funding as well as a reduction of operational expenditure will be required to mitigate the risk of the effect of the current level3 lockdown of which the impact will only be seen from the 18 of January 2021.

3.5 Conclusion

Year-to-date performance of revenue and expenditure compared to budget for the 2020/2021 financial year are reasonable at the end of December 2020, but more emphasis will be placed on collecting outstanding debt that might be challenging considering the effect of economic activities at the current levels of lockdown.

4.1.2 Table C2: Monthly Budget Statement – Financial Performance (standard classification)

This table reflects the operating budget (Financial Performance) in the standard classifications which are the Government Finance Statistics Functions and Sub-functions. These are used by National Treasury to assist the compilation of national and international accounts for comparison purposes, regardless of the unique organisational structures used by the different institutions.

The main functions are Governance and Administration; Community and Public Safety; Economic and Environmental Services; and Trading services. It is for this reason that Financial Performance is reported in standard classification, Table C2, and by municipal vote, Table C3.

Debtors' age analysis

The value reflected in the Financial Position (Table C6) does not reconcile to the Debtors Age Analysis shown on Supporting Table SC3. The financial position includes the total annual billing to date and some debtor classifications which do not form part of the consumer debtors, whereas the age analysis only includes those consumer amounts which have become due and not the 'future' amounts which will only fall due in coming months for consumers who have chosen to pay property rates and annual charges on an instalment basis.
