Dear Customer

LIMITATION OF SMALL SCALE EMBEDDED GENERATION (SSEG) SYSTEMS

This letter serves as notification for the following limitation on all inverters of Small Scale Embedded Generation (SSEG) systems.

All inverter sizes shall be limited to 75% of the tariff breaker size or notified maximum demand.

The export demand shall be limited to 25% of the tariff breaker size or notified maximum demand.

NRS097-2-3: 2023, 4.1.7 refers to *“Utilities may modify the criteria, or add additional criteria, to meet their specific requirements considering their network characteristics”*.

These additional characteristics have been implemented to safeguard the electrical distribution network.

Yours sincerely,

L LAING
SENIOR MANAGER: ELECTRO-TECHNICAL ENGINEERING
