- **Professional Installation:** A qualified and registered electrician must perform all electrical connections.
- **Changeover Switch & Earth Leakage:** The generator is wired to the main distribution board (DB) through a changeover switch to prevent backfeeding the grid and to ensure safety through an earth leakage unit.
- **Fuel Source:** The generator's fuel line must be connected to a suitable external fuel source, with the connection handled by a qualified professional.

3. 3. Testing & Certification:

- **Testing:** The installed generator is tested to ensure it starts automatically and functions correctly during a simulated power outage.
